**RECOGNITION****UB researcher wins a presidential award**

University at Buffalo researcher Gregory A. Fabiano is the winner of a Presidential Early Career Award for Scientists and Engineers for his work with children with attention deficit hyperactivity disorder, the school announced.

Fabiano, a faculty member in UB's Graduate School of Education and an investigator with the university's Center for Children and Families, is among 67 scientists recognized by the White House as the most promising American researchers in their fields. The award is the nation's highest honor for researchers in the early stages of their scientific careers.

Fabiano's most recent research project uses a driving simulator to improve driving habits among teenagers with ADHD as well as to build better relationships within their families.
